Department for Education

16 November 2026

Dear Headteacher/Principal,

16 to 19 2026 Autumn checking exercise - November late results and value added measures available

November late results

November late results are now available in the 16 to 19 Checking Exercise Portal. Check your data and report any issues by 14 January 2027.

This file contains results received from awarding organisations (AOs) between 17 September 2026 and 30 October 2026 regardless of when the qualification was awarded.

When revised data is published

We will include all late results and re-marks received by 30 October 2026 in revised performance measure data published in early 2027.

Late results or re-marks received between 1 November and 3 February 2027 will be included in the final performance measures data published in Spring 2027.

Raise a results enquiry

If you find any issues in your data, raise a results enquiry as soon as possible. You must submit all enquiries by 14 January 2027 using the Results Enquiries Portal.

Use the results enquiries portal to report:

- a missing qualification
- an incorrect grade
- a result that does not belong to a student

Any corrections will appear in final performance measures data published in **Spring 2027.**

Check your 16 to 19 value added measures

For the 2025/26 academic year, we will publish 16 to 19 value added measures for these Level 3 cohorts:

- A Level

- Academic
- Applied General
- Tech Level

We will also publish value added measures for the Level 2 technical certificate cohort.

Checking your value added data

You can download the following CSV files in the 16 to 19 Checking Exercise Portal to check your value added data:

- **'value added data'**- student-level value added data by subject and qualification type
- **'summary data with value added data'**- a new summary file that includes school and college-level value added measures

About the value added data

The 2025/26 16 to 19 value added data is based on the provisional performance measures data for 2025/26.

It does not include amendments submitted during the 2026 16 to 19 Autumn checking exercise.

If your amendments are accepted, they will appear in the revised performance measures data publication in early 2027.

Ready reckoner

A ready reckoner tool based on 2025/26 provisional value added data will be published on GOV.UK in mid-December.

This will be updated when revised value added data is published in early 2027.

You can use the ready reckoner and the value added CSV file to:

- calculate value added scores for subsets of students
- see how your school's or college's scores would change if students achieved different outcomes

Check Your Performance Measures Data (CYPMD) portals

The CYPMD portals are accessed using a DfE Sign-in account. If you encounter any difficulties creating a DfE Sign-in account or have forgotten your login details, use the DfE Sign-in contact form.

Find guidance and support

Read our guidance to find out:

- how to raise a results enquiry
- how to interpret your data
- where to get further support

Yours faithfully

Department for Education
